### **TECHNOLOGY THE NEXT 20 YEARS IN THE FUTURE**

In 20 years, technology will be in all homes synchronized in all household appliances. Artificial intelligence will be a help to humanity, especially for doctors, since it will serve to diagnose diseases at an impressive speed, it will also serve to provide medicines to patients without the need to consult a doctor.

The devices will be simpler and within reach of a user. Jobs will be taken virtually with the help of augmented reality technology
